RECEIVED
JUN 29 1983

State of New Jersey
Dept. Environmental Protection
Division Water Resources

Dear Ms. Radow:

Chevron has received your letter dated June 6, 1983 concerning the above-referenced permit application. In response to that letter, Chevron is hereby submitting the information requested by the DEP along with the CP #1 form.

● Item 8a (CP #1 form) Source of Water Supply

In the case of the North Field and East Yard Storm Water Retention Basins, the source of water supply is rain water runoff collected from various areas at our facility.

The source of water supply in the case of the North Field Surge Pond is direct precipitation and, to some extent, water from oily solids/liquids which are stored in this area.

- With regard to Item 11 (CP #1 form), I have attached a letter indicating that the Refinery General Manager (D. E. Tormey on the date the application was signed) has been designated for the purpose of this permit application as the signatory representative of R. S. Proctor, the Vice President of Manufacturing, Chevron U.S.A. Inc. The application, therefore, was signed as authorized by a corporate official of vice president level or above.

With the submission of the above information, Chevron considers its application to be administratively complete. If this is not the case, Chevron hereby requests an extension of time to provide any additional information which may be required. If you have any questions, please call Mr. Ken Zinis at (201) 738-2705.

Sincerely,

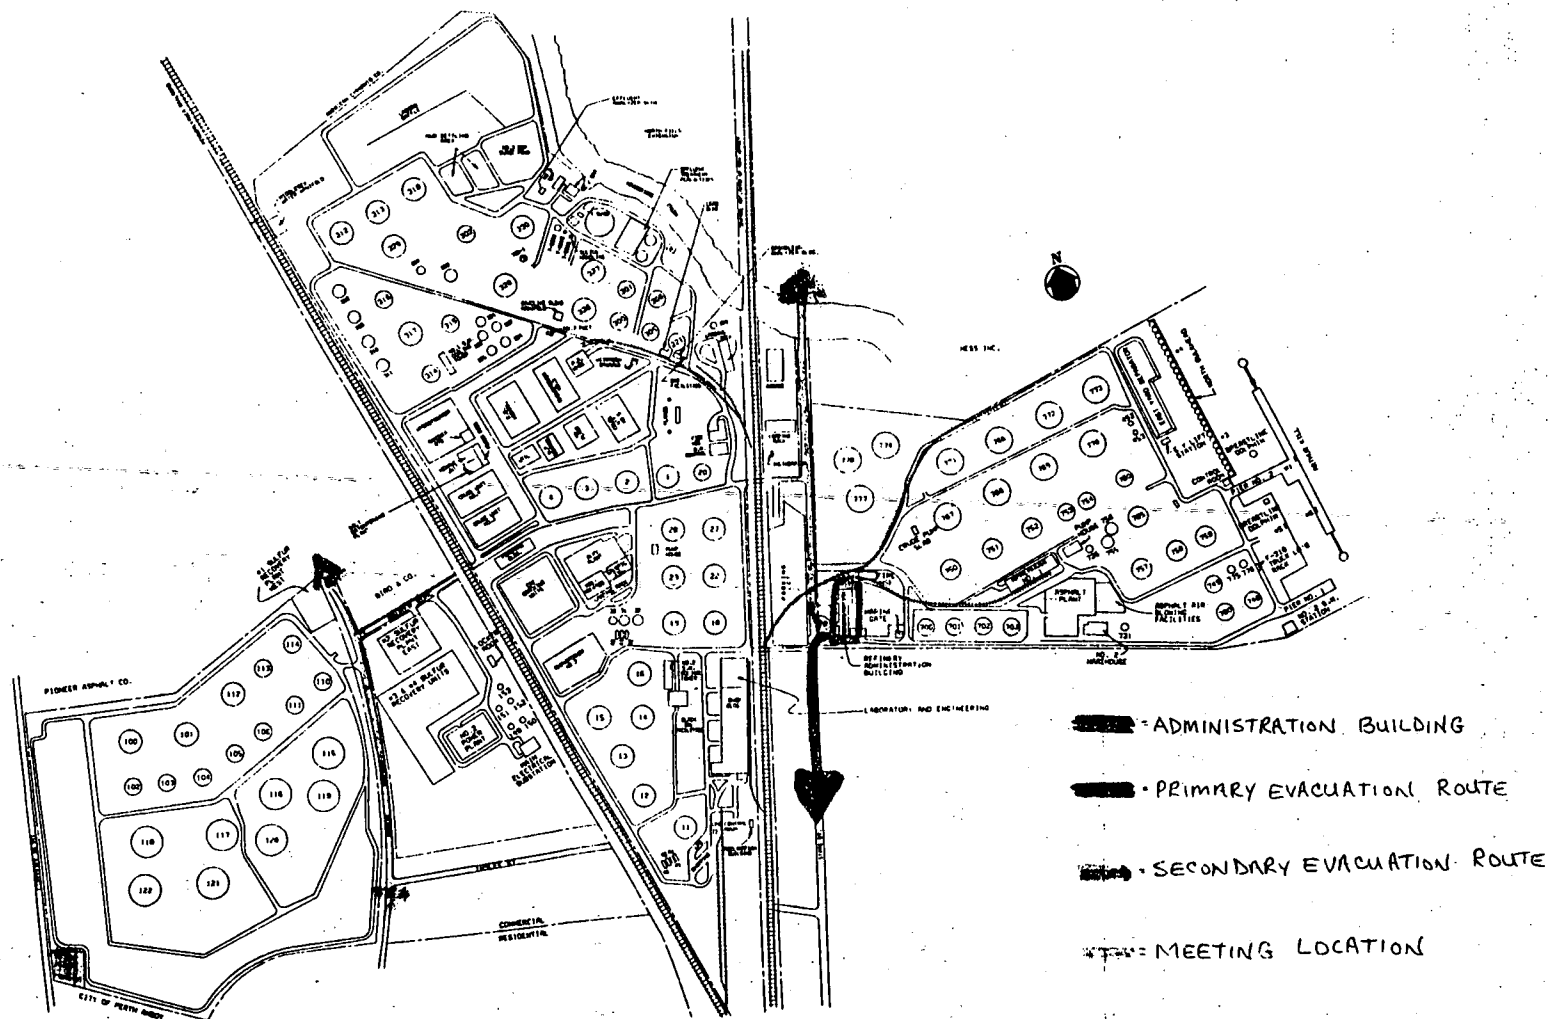

A handwritten signature in cursive script, appearing to read "C. L. Orman".

C. L. Orman
Refinery Manager
